

CHARTPLOTTER

The chartplotter Nav XP is compatible with Navionics+ and Navionics Platinum+ charts, the world leaders in this field. Navionics charts offer an excellent selection of layers and features, making them perfect for both the user who wants to see everything and the user who just wants the basics. Navionics charts are also the most reliable on the market with daily updates that can be applied wirelessly to the plotter, which means you'll always have the most up-to-date map data.
